ENCAPTURE 24/7

Probiotic Carpet Cleaner and Odor Eliminator

DESCRIPTION

Encapture 24/7 is a probiotic carpet cleaner and odor eliminator that removes soil using a minimum of moisture. The probiotic formula allows deep cleaning and degreasing and suppresses the growth of odors. Encapture 24/7 is safe to use on all carpets and leaves no residue. Thanks to the encapsulation process, the cleaning foam surrounds the soil particles and dries soon after. The loosened particles are then removed by means of a standard vacuum cleaner.

USE

- **Carpets:** Fill sprayer and moisten carpet evenly. Do not allow carpet to dry. When done, agitate using either a low-speed buffer with carpet bonnet or disk brush, counter-rotating brush machine or similar. Periodically rinse and flip bonnet when visibly soiled. Clean entire area in overlapping passes to avoid striping. Allow to dry completely before vacuuming.
- **Spotting:** Dampen spot completely and allow to stand for 10 minutes. Agitate manually with a spotter brush. Allow to dry fully before vacuuming.

DOSAGE

1:32 (4 oz/gallon)

TECHNICAL CHARACTERISTICS

- pH: 5.5 ± 0.5
- Color: colorless to yellow
- Fragrance: rose

Pollet does not advise using probiotic cleaners in certain limited hospital areas: semicritical or critical items and surfaces.

STORAGE

Keep the product in its original closed packaging. Do not allow to freeze.

ECOLOGICAL INFORMATION

- Biodegradable product (EC 648/2004)
- Packaging 100% recyclable
- CO₂ neutral production and transportation from Belgium to your warehouse
- 100% wastewater treatment
- Production based on 100% renewable energy (solar, thermal or hydroelectric)

SOCIAL RESPONSABILITY

- Contributes to a concrete sustainable development project (via CO2Logic).
